

ZEGEN PACKAGING 2026

Product Catalog

About Us

Zegen Packaging is a global manufacturer of innovative food service packaging solutions, delivering high-quality, sustainable products to clients across North America and around the world. Headquartered in Seattle, WA, Zegen operates through a network of international manufacturing facilities, enabling us to offer factory-direct pricing, exceptional lead time flexibility, and reliable supply chain continuity.

Our vertically integrated operations span design, tooling, production, and quality control, allowing us to maintain rigorous standards while scaling efficiently to meet the demands of national restaurant chains, food service distributors, and private-label brands.

Our Mission

To manufacture and deliver world-class packaging solutions that combine quality, affordability, and environmental responsibility for a global market.

Our Core Values

1. Manufacturing Precision

We uphold consistent quality across all facilities

2. Global Reach, Local Support

International scale with hands-on service from our U.S. headquarters

3. Responsiveness

Flexible and adaptive production aligned with market needs

4. Sustainability

A core priority embedded in our materials, methods, and long-term vision

Our Certifications

Our Products

Nice® Straws

Zegen plastic and paper straws are great for restaurants, bars and coffee shops. Available in a multitude of colors and diameters, Zegen has the perfect straw companion for all types of cold beverages.

Our Straw Materials

At Zegen Packaging we offer high-quality straws made from a variety of materials to meet diverse customer needs. Each material is selected for its unique benefits in terms of sustainability, durability, and application.

1. Polypropylene (PP)

Description: A durable and lightweight plastic commonly used for food-safe applications.

Features: Reusable, recyclable (Code #5), resistant to heat and cracking.

Best For: Cold and hot beverages in restaurants, cafes, and events.

2. Paper

Description: Biodegradable and compostable paper straws made from food-grade materials.

Features: Eco-friendly, disposable, customizable printing.

Best For: Single-use applications, eco-conscious events, quick-service establishments.

3. Polylactic Acid (PLA)

Description: A compostable bioplastic derived from renewable resources like corn starch.

Features: Industrially compostable, looks and feels like plastic, clear or colored options.

Best For: Eco-friendly packaging, cold drinks, sustainability-focused venues.

4. Polyhydroxyalkanoates (PHA)

Description: A next-generation biodegradable plastic made by microbial fermentation.

Features: Fully compostable in marine and soil environments, petroleum-free.

Best For: High-end sustainable offerings, environmentally strict jurisdictions.

Straw Sizes & Diameters

Zegen Packaging offers straw in a variety of sizes to suit every beverage type-from light drink to thick, textured blends. Choose perfect size for your application

	TYPE	DIAMETER	BEST FOR
○	Stirrers	0.118 in (3 mm)	Stirring hot drinks like coffee or espresso. Compact and functional.
○	Skinny Straws	0.138 in (3.5 mm)	Light beverages such as cocktails, juices, or sodas. Sleek and stylish.
○	Jumbo Straws	0.197 in (5 mm)	The most popular size for sodas, iced tea, and water.
○	Fat / Giant / Zombie	0.276 in (7 mm)	Great for smoothies, milkshakes, and thicker drinks.
○	Boba Straws	0.472 in (12 mm)	Specifically designed for bubble tea, with large tapioca pearls or jellies.

Zegen PET, RPET, U-Shaped Cups & Lids

Zegen PET Cups

Zegen PET Cups are clear, strong, and disposable cups for cold beverages. Made from Polyethylene Terephthalate (PET), they are available in sizes from 3 oz to 44 oz. Our special feature is that the 12 oz through 24 oz cups all fit one common 98 mm lid (Flat/Dome), simplifying inventory and service.

Zegen Lids

High-quality PET and RPET Lids are available for cup sizes ranging from 8/10 oz to 44 oz (78 mm to 115 mm) in both flat and dome styles. We also produce squat- and sip-style lids, as well as universal 90 mm lids (10–22 oz) that fit all U-Shape Cups. Our lids provide a secure, snug fit on our cups and are guaranteed leak-proof.

Zegen RPET Cups

RPET (Recycled Polyethylene Terephthalate) is a durable and more sustainable alternative to virgin PET, helping to reduce plastic waste. It's available in sizes ranging from 3 oz to 32 oz.

Zegen U-Shaped Cups

U-Shaped cups are disposable plastic cups with a distinctive rounded bottom, designed primarily for cold beverages. They are popular for their trendy design and durability. Made from PET plastic, they are available in sizes ranging from 10 to 22 oz and are compatible with our flat or dome lids.

Our Cup & Lids Materials

PET

PET (Polyethylene Terephthalate) cups are clear, durable, and lightweight plastic containers widely used for serving cold beverages and food. They are the most common type of clear disposable cup in the foodservice industry .

Features:

- Crystal-clear transparency with high clarity
- Strong and highly resistant to cracking or shattering
- Lightweight, reducing shipping costs
- Highly recyclable, easily converted into RPET

Best For:

Cold food, beverages, and condiments because their exceptional clarity enhances product display.

Our Cup & Lids Materials

RPET

RPET (Recycled Polyethylene Terephthalate) is a more sustainable alternative to virgin PET. Its primary benefits include reducing plastic waste, promoting sustainable packaging, and lowering carbon emissions.

Features:

- Retains most of the clarity and strength of virgin PET
- Eco-friendly, reduces reliance on virgin plastic
- Fully recyclable and can re-enter the circular economy
- Lower environmental impact, using up to 75% less energy in production

Best For:

Cold food, beverages, and condiments, offering the same functional performance as virgin PET cups but utilizing a more sustainable, recycled material source.

Our Products

PP Portion Cups & Lids

Zegen PP Portion Cups & Lids

Zegen PP Portion Cups are small, lightweight, and durable containers made from Polypropylene (PP) plastic. Ideal for portioning dressings, sauces, or dips for takeout and delivery. Available in sizes 0.75 oz to 5.5 oz in clear and black colors. The lids are made from PP plastic in a flat style and are sized from 45 mm to 74 mm to fit all cups (0.75 oz to 5.5 oz).

Our Portion Cup Materials

PP Polypropylene (PP) is a highly favored material in the food industry, offering superior durability and the ability to withstand contact with oils and fats.

Portion Lid Materials

PET These lids are made from durable PET material in a flat shape, specifically engineered to create a secure, leak-resistant seal with your PP portion cups, essential for safe takeout and delivery of sauces, dressings, and dips.

Features:

- Leak-Resistant
- Reclosable
- Stackable
- Multiple Sizes
- Available in clear & black color options

Best For:

Holding hot, oily, or acidic foods, sauces, and dressings

Zegen PET, RPET, PP Deli Containers & Lids

Zegen Deli Containers

A deli container is a versatile, plastic food storage solution designed to keep prepared foods fresh and secure during storage and transport. Key features include airtight, leak-resistant lids; stackable designs for space-saving efficiency; and durable materials that can withstand high and low temperatures. It is available in sizes ranging from 8 to 32 oz and a choice of materials: PET, RPET, and PP.

Zegen Deli Container Lids

Our deli container lids are available in sizes matching the full container range (8 to 32 oz) and come in a choice of materials (PET, RPET, and PP) and styles (flat and dome), depending on the container material.

Features:

- Stackable
- Reclosable
- Leak-resistant

Best For:

The storage and transport of various prepared foods, including hot or cold items like soups, sauces, salads, and deli items.

Our Deli Container & Lid Materials

PET

Offering the highest level of clarity and gloss, this material makes cold condiments, side salads, or desserts highly and instantly visually appealing.

RPET

RPET provides the same crystal-clear, glass-like visibility as virgin PET, while serving as a more sustainable, eco-friendly alternative.

PP

This material provides an excellent barrier against oils, fats, and acidic foods, and it is suitable for food with high temperatures.
